

Michael O. Suppan

Lisle, IL | (630) 962-2588 | Msuppan1304@gmail.com

EDUCATION

University of Kentucky

Bachelor of Science, Mechanical Engineering

- **Coursework:** Thermodynamics 1&2, Systems/Vibrations, Mechanical Design, Applied CFD, Numerical Heat Transfer

2027

Lexington, KY

Benet Academy

2022

Lisle, IL

WORK EXPERIENCE

Motorola Solutions | VS&A Sales Engineering Intern

May 2026 - Present

- Conceived and developed Pioneer, Motorola Solutions' first RFP engine. Using Python to automate proposal generation, it reduces average RFP response time
- Architected Pioneer around a proprietary large-language model and a dedicated SQL database. Delivering accurate answers to technical queries from our knowledge base
- Led the full development and design of Pioneer, allowing for cross-functional teams to define requirements for a product with no internal precedent
- Delivered live product demonstrations to customers using interactive demo environments. Which translated complex technical interfaces into understandable value that has helped secure multiple companies to our ecosystem
- Serve as a technical resource to our product portfolio. Producing detailed architecture briefs and delivering training sessions for internal sales teams and external partners, which improves their ability to position the solution effectively
- Configured and deployed Avigilon and Pelco cameras and supporting servers for customer demonstrations. Using Python scripts and network tools, setup time was reduced and enabled the sales team to showcase enterprise video-security hardware effectively
- Supported the healthcare team by helping design video-security and access-control solutions, helping meet compliance standards and improving monitoring of patient areas

Chamlin & Associates | Engineering Intern

May 2025 - Aug 2025

- Leveraged problem-solving skills and coursework in CNC machining, AutoCAD, and Python to design and finalize three mechanical components for municipal projects, enabling on-time delivery and client approval
- Designed and supervised installation of a municipal lighting system for the City of Morris using AutoCAD and Creo, completing the 1.5-month project two weeks ahead of schedule
- Utilized AutoCAD to finalize detailed drawings for a wastewater-treatment plant in Oglesby, reducing design revisions by 30% and supporting a smooth permitting process
- Coordinated daily communications between contractors and Chamlin's design and field teams via email and SharePoint, which helped resolve issues within 24 hours and kept the project timeline on track
- Learned to operate total-station and GPS surveying tools with the crew, producing accurate site maps for Illinois state routes and tollways that supported construction planning

PROJECTS

Airfoil Aerodynamic Modeling

- Modeled airfoils using airflow simulations to build interactive guides visualizing lift, drag, and pressure distribution across varying angles of attack.

Web Scraper for Business & Data Analysis

- Built a Python scraper (BeautifulSoup, Selenium) to extract and structure competitor pricing and market data, then used Pandas and Matplotlib to surface pricing and competitive trends.

Live Stock Market Tracker

- Developed a Python program that polls a live financial API (yfinance) to track real-time price changes, moving averages, and intraday highs/lows on a continuously updating dashboard.

LEADERSHIP AND INVOLVEMENT

University of Kentucky Ice Hockey | Assistant Captain

2022 - 2026

- Compete at the national level with more than 20 hours a week in practices, workouts, and games.
- Developed time management and communication skills while being a full-time engineering student.

Boy Scouts of America | Eagle Scout

May 2022

- Built and provided the Danada Equestrian Center with horse jumps used in their annual fundraiser.
- Led more than 30 scouts and scoutmasters to fundraise for the project.
- Constructed three custom horse jumps standing 5'5", weighing over 200 lbs, with twelve-foot PVC hurdles and custom painted decals.

Student Activity Board

2023 - Present

- Active board member of SAB at the University of Kentucky.
- Plan, organize, and monitor events in collaboration with other board members.

SKILLS & CERTIFICATIONS

Software: Creo, AutoCAD, Fusion 360, ANSYS Fluent

Programming Languages: Python, MatLab

Machinery: 3D printing, CNC machine
